

	Document ID	Title
1	US 20080071781 A1	Inexact pattern searching using bitmap contained in a bittest command
2	US 20080071780 A1	Search Circuit having individually selectable search engines
3	US 20080071779 A1	Method and apparatus for managing multiple data flows in a content search system
4	US 20080071765 A1	Regular expression searching of packet contents using dedicated search circuits
5	US 20080071757 A1	Search engine having multiple co-processors for performing inexact pattern search operations
6	US 20080010256 A1	ELEMENT QUERY METHOD AND SYSTEM
7	US 20070192739 A1	Scene transitions in a zoomable user interface using a zoomable markup language
8	US 20070112714 A1	System and method for managing knowledge
9	US 20070005624 A1	Scalable transformation and tree based query language node - set selection
10	US 20060238540 A1	Methods and systems for scoring multiple time-based assets and events
11	US 20060235811 A1	System and method for mining data
12	US 20060176403 A1	Distributed software construction for user interfaces
13	US 20060100807 A1	Multiple calibration ranges stored in a process transmitter
14	US 20050128200 A1	Methods and systems for scoring multiple time-based assets and events
15	US 20050035970 A1	Methods and apparatuses for authoring declarative content for a remote platform
